

I, Psychopath

Stephen M. Kahn is a psychologist who has studied, researched and interacted with various types of criminals for over thirty five years. In addition, he has taught for fifteen years in the criminal justice programs of several universities at the graduate and undergraduate level. While many deviants are of great interest to him, one of the most fascinating segments of this population is the anti social personality and particularly, the psychopath. This type of individual is the most enigmatic of all law breakers because of the ability to commit crimes in a totally random fashion. The unpredictability of this person's behavior has always made it difficult for authorities to effect an apprehension in a timely manner. Until the psychopath is arrested, there is really no stopping the crimes that continually occur. The book is a fictional account of such a person and details his development, rationales and actions as culled from the years of experience in working with this type of personality.
