

Blood Notes

Dr. Peter Mallow, a world-renowned university scientist hot on the trail of a lethal Asian bird flu, becomes concerned over the erratic behavior of his newest research student. He records his observations about the troubled young man in a common laboratory notebook. Mallow's notes take us into a downward spiral of career destruction, corporate wrongdoing, a devastating hurricane, and the deadliest pandemic in history. Will Mallow's notes survive? Can the virus be stopped? And who is the scientist destined to become a Nobel laureate? Boor takes fact and extends it with a vivid imagination and a great sense of humor to give us a suspense novel that entertains and also illuminates some of the issues facing science and medicine today. I highly recommend this book; you will love the personalities as they try to control their destinies (and ours). C.J. Peters, M.D., author of VIRUS HUNTER; Chief of the U.S. Army unit that battled ebola virus in THE HOT ZONE, former Chief of Special Pathogens at the CDC. Scary, because it's told from the inside. A great concept, full of drama and what an ending! Roger Corman, Filmmaker a fascinating window into the world of biological research and the human condition a nightmarish scenario, splicing bird flu and DNA manipulation with human despair. Unseen things are coming to your neighborhood soon. Be afraid. Be very afraid. James A. Mangum, author of DEAD AND DYING ANGELS and THE VINEGAR ROON MURDERS
